

Quality, Reliability, Service

Simply UV-5AT

Proven Success...

The UV-5AT is equipped with full Temperature Compensation over its entire temperature range by compensating for variations in oil temperature and viscosity, maintaining consistent elevator operation regardless of oil temperature.

Engineering

EECO hydraulic control valves are designed for consistent reliable elevator operation. Our decades of experience have firmly established us as the leader in the elevator industry.

Quality

All EECO valves are thoroughly tested in our fully computerized testing facility before shipment. Be assured that you will get the highest quality products from EECO.

Reliability

Backed by nearly 70 years of experience, we are committed to producing the most dependable elevator products.

Service

Skilled EECO technicians are just a phone call away. Use our toll-free number for prompt efficient service.
